

163 Projects Founded by the International Community Approved for implementation in the Gaza Strip

July 2011

Ministry of Defense
Coordination of Government Activities in the Territories

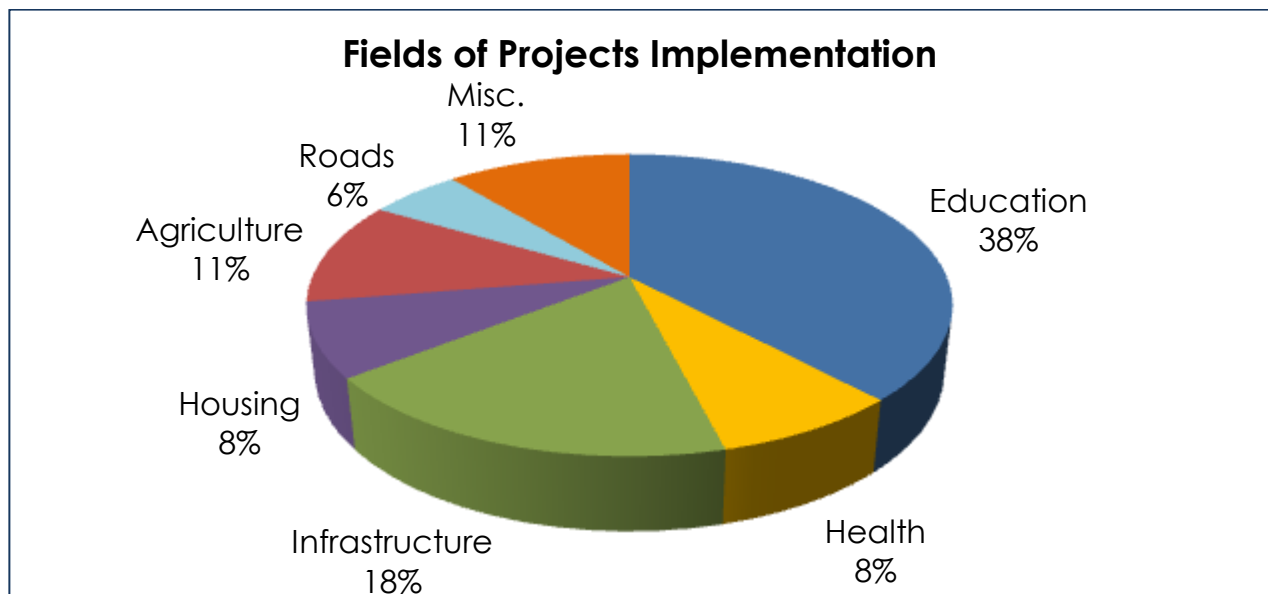

Israel is working with the international community and the Palestinian Authority to advance and to streamline the approval processes for internationally funded projects. To this end a coordination and monitoring mechanism for internationally funded projects has been established, subject to security considerations.

The approval process for internationally funded projects:

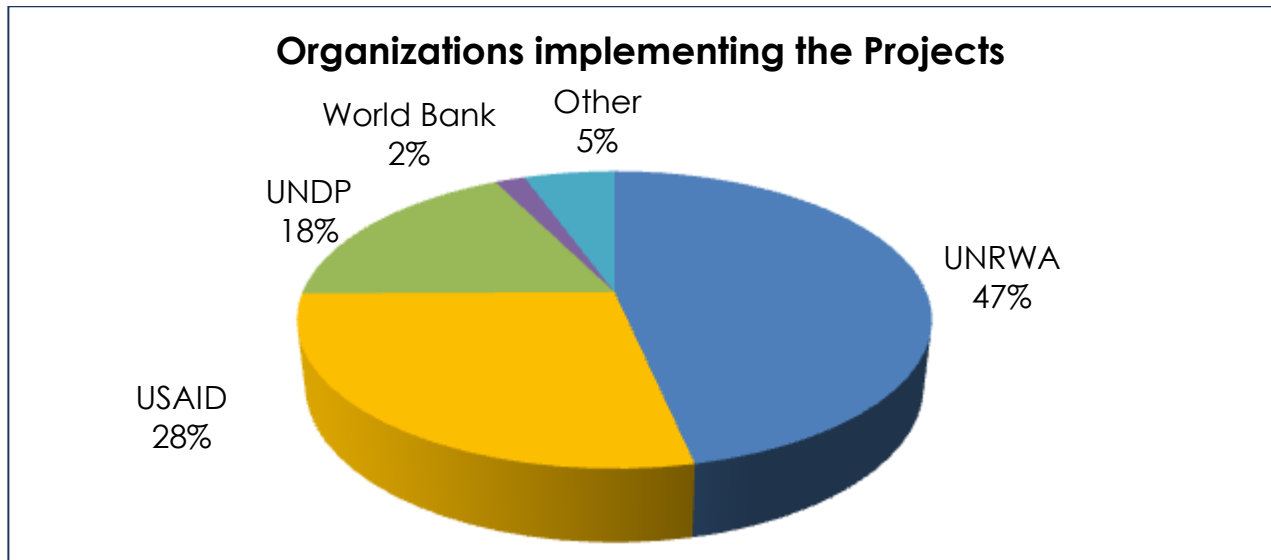

163 internationally funded projects have been approved so far. Since the day of the cabinet's decision 149 new projects have been approved.

The Cabinet's decision specified that projects in the fields of education, water, sewage, housing and health would be prioritized. Projects in these fields constitute 72% of all the projects that have been approved for implementation in the Gaza Strip.

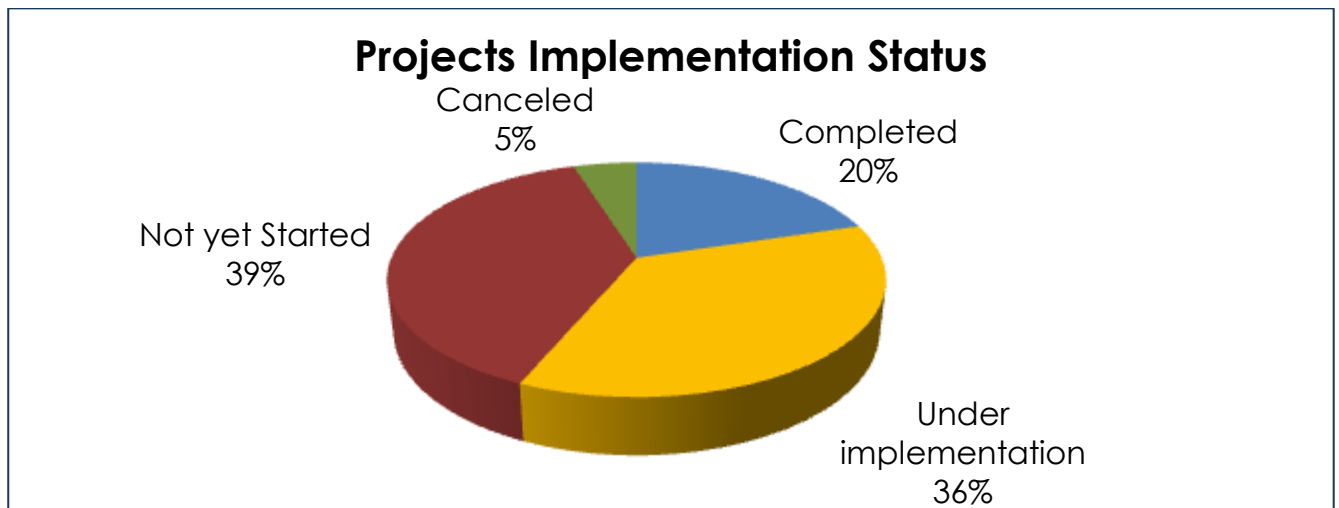

65% of projects are implemented by the various UN agencies:

At the end of June 2011, 33 projects were complete and 59 others were in the implementation stages. 279,781 tons of construction materials have been transferred for these projects:

In March 2011 Israel carried out an operation to transfer aggregates into the Gaza Strip from Sufa area, during which a section of the security fence between Israel and the Gaza Strip was removed.

The operation lasted three weeks and was made possible by the protection of the IDF's Southern Command. It was carried out despite Hamas' escalation of hostilities during the operation.

While the operation to transfer aggregates lasted, approximately 250 rockets and mortar rounds were fired at Israel.

In the framework of the operation, approximately 60,000 tons of aggregates that had been purchased by various international organizations were transferred into the Gaza Strip for use in approved projects.

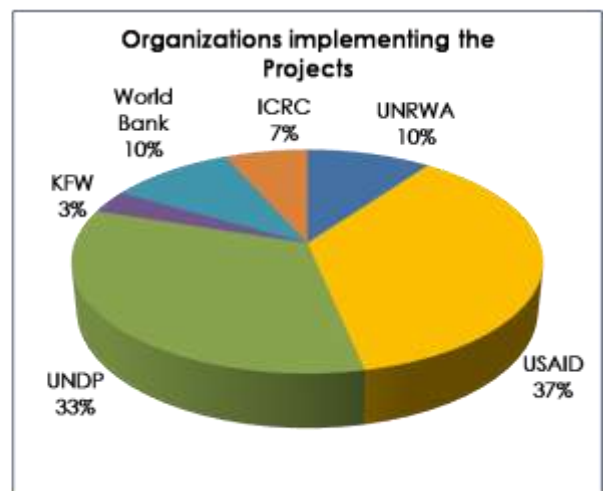

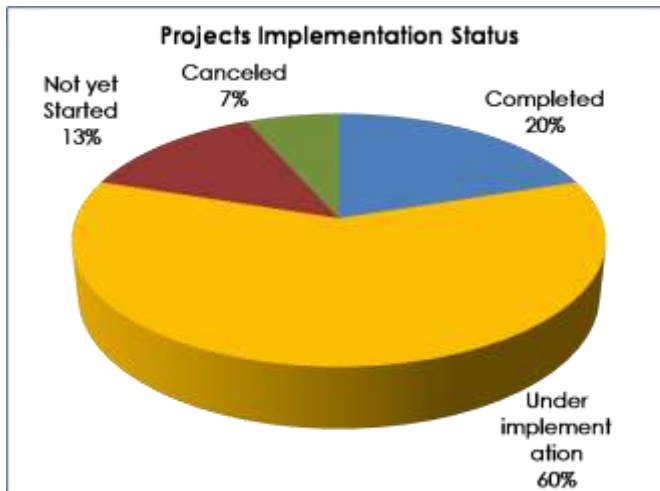

Infrastructure Projects

31 infrastructure projects have been approved so far (water, electricity, and sewage), which include the construction of 3 new wastewater purification plants, the upgrading of three other such plants, and the upgrading of the electric grid:

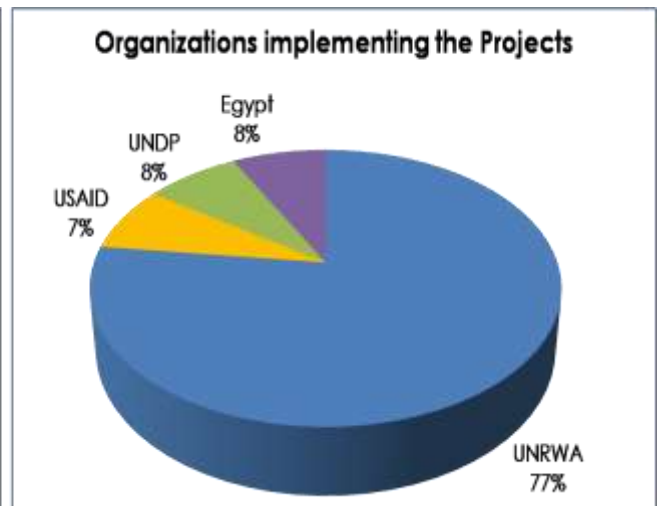

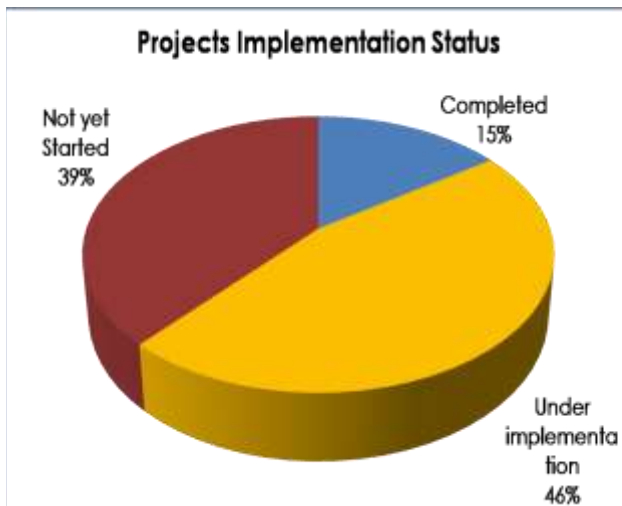

The Status of the Infrastructure Projects:

Housing Projects

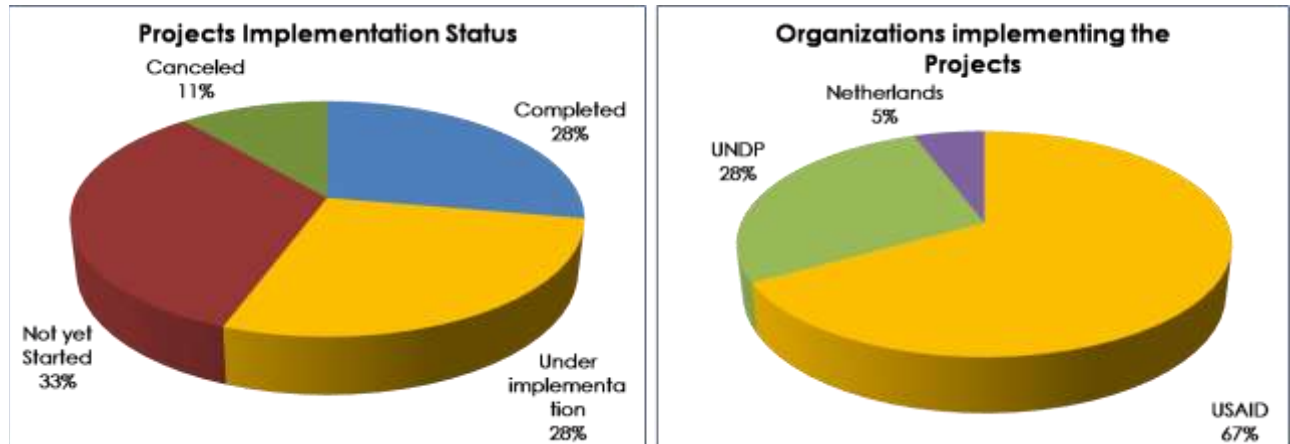

13 housing projects have been approved so far, which include the construction of 2,000 new housing units:

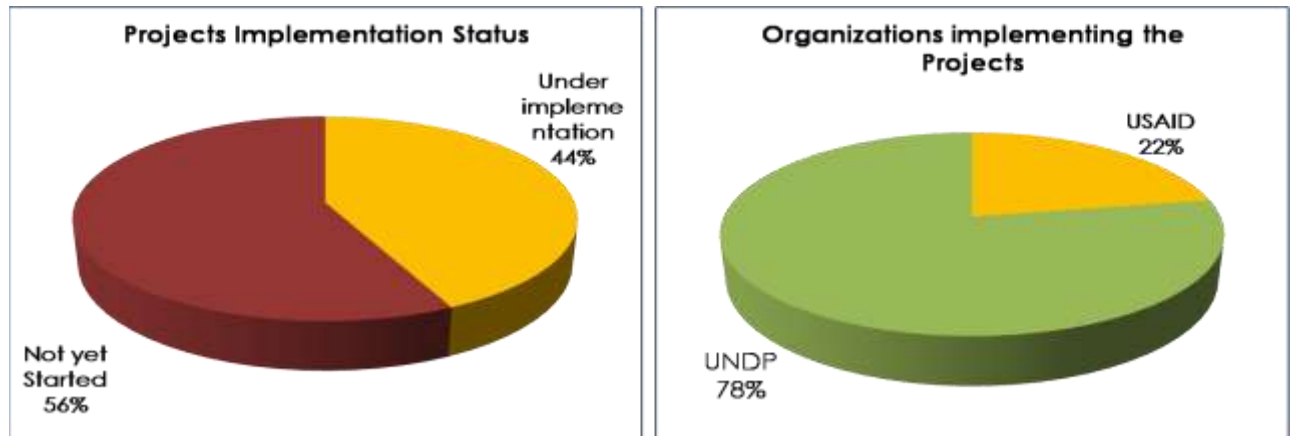

Agriculture Projects

18 agriculture projects have been approved so far, which include the establishment of 1,600 cultivation plots and the paving of 21 agricultural roads:

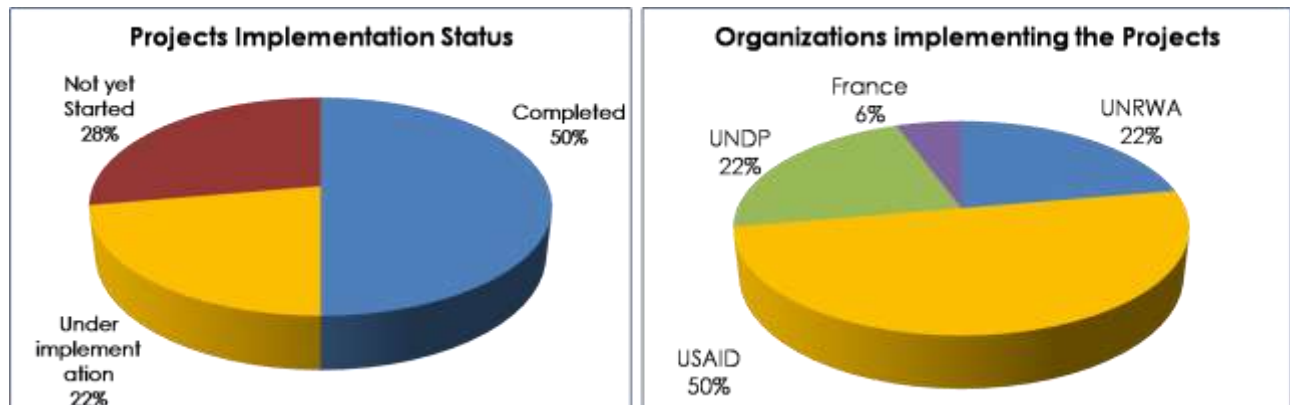

Road Projects

9 road paving projects have been approved so far:

Miscellaneous Projects

18 projects in various fields have been approved so far, including, among other things, the construction of a new cultural center, a vegetable market, a park, and the renovation and expansion of the UNRWA headquarters:
