I — INTRODUCTION

The Report to the Congress on Voting Practices in the United Nations was first published in 1984, for the year 1983 pursuant to Public Law 98-151 and Public Law 98-164. This year's report is submitted in accordance with section 406 of the Foreign Relations Authorization Act, Fiscal Years 1990 and 1991 (Public Law 101-246 (22 U.S.C. §2414a)).

The UN Security Council (UNSC) and the UN General Assembly (UNGA) are arguably the most important international bodies in the world, dealing with threats to peace and security, disarmament, development, humanitarian relief, human rights, the environment, and narcotics— all of which directly affect major U.S. interests. This report reviews voting practices in the UNSC and the UNGA in calendar year 2020, covering parts of Session 74 and Session 75 of the General Assembly, and presents data in a variety of formats. The report summarizes the actions of the UNGA and the UNSC (Section I). All UN Security Council resolutions and votes for the calendar year are described and voting on them is tabulated (Section II). The report statistically measures the overall voting of UN member states at the General Assembly in comparison with the U.S. voting record (Section III). It also lists and describes UNGA resolutions selected as particularly important to U.S. interests (Section IV). It then presents the voting patterns on General Assembly resolutions relating to Israel (Section V). Finally, the report lists a side-by-side analysis for every country according to their respective UN regional grouping (Section VI).

Voting coincidence provides the “comparison of the overall voting practices in the principal bodies of the United Nations” requested by the Congress. Because the UN acts on so many diverse issues, the voting record of a UN member during the General Assembly and Security Council provides insight into a country's orientation in world arenas. Voting coincidence refers only to the UN General Assembly and Security Council and does not account for support for U.S. policy in other bodies in the UN System, other multilateral fora, or bilateral contexts. Most bodies in the UN system approve resolutions by consensus where no votes are taken. In contrast, General Assembly resolutions often require a vote, in part due to the political nature and non-binding aspect of General Assembly resolutions. Overall voting correlation between countries is dependent on the types of resolutions that come to a vote. For example, Israel-related resolutions account for approximately 20 percent of resolutions that are adopted with a vote, significantly affecting the voting coincidence for countries that oppose these resolutions.

Approximately 80 percent of all resolutions, however, are adopted by acclaim. While it is difficult to infer specific positions from resolutions adopted by acclaim, it suggests insights into areas of general agreement among member states of the UN. For this reason, the report also provides limited information on how these resolutions figure into voting coincidence.

COVID-19 Impacts: Between March and late July, a UN lockdown ended all in-person meetings, consultations, and voting, leading to alternative methods for meetings and voting for this period. Despite fewer in-person gatherings, UN work continued largely unabated as evidenced by the statistics on output. By August, the UN resumed limited in-person work, or hybrid models of in-person and video teleconferences.

I. A — SUMMARY: UN GENERAL ASSEMBLY

COVID-19 Impact on General Assembly Voting: During the COVID-19-lockdown period, which began in mid-March, the General Assembly employed the “silence procedure” method of voting, requiring unanimous consensus to adopt any resolution under consideration. Under the silence procedure, the president of the General Assembly sent draft decisions to all member states, and if no member objected (broke silence) within the 72-hour period while a resolution was up for a “vote,” the resolution was adopted unanimously. The silence procedure was in effect until August 30, 2020 when normal in-person voting procedures resumed. Anticipating future needs to suspend in-person UN sessions, the GA adopted a resolution on electronic voting on November 13, 2020. The resolution, which was adopted with a vote of 123 yes (including the United States), 19 no, and 29 abstentions, allows for electronic voting procedures when the GA cannot convene in person. The United States, among others, delivered an Explanation of Vote emphasizing that the E-voting decision should only be used for “essential operational decisions” such as the adoption of budgets. The COVID-19-adjusted voting procedures appear to have had little effect on the overall adoption of General Assembly resolutions, since the number of resolutions concluded in 2019 (344 total, 100 adopted by votes) was about the same in 2020 (309 total, 100 adopted by votes). Some countries opted not to introduce resolutions (for example, Cuba elected not to submit its anti-boycott resolution for the first time in 29 years) presumably because under silence procedures any single objection would have constituted an effective veto.

Overall Voting Coincidence: The average voting coincidence for contested resolutions (requiring a roll-call vote, instead of being accepted by consensus without a vote) between the United States and the other 192 countries in the UN General Assembly was 33 percent for 2020, a one percent increase from 2019, and consistent with the 20-year average of 32 percent.

Allies and Adversaries: In 2020, Israel had the highest voting coincidence with the United States, and Syria had the lowest. The 10 countries with the highest voting coincidence with the United States were, in descending order: Israel, Micronesia, Canada, Australia, United Kingdom, Marshall Islands, Hungary, France, and Czechia, with Estonia, Germany, and Lithuania tying for the tenth spot. The 10 countries with the lowest voting coincidence with the United States were, in ascending order from the lowest up: Syria, Iran, Venezuela, Cuba, Nicaragua, China, Cambodia, Burundi, and Zimbabwe, with Algeria, Sudan, Lebanon, and the Democratic People’s Republic of Korea tying tenth lowest position.

U.S. Opposition: In 2020, the United States voted against 69 percent of UNGA resolutions, more than any other UN member state. The average UN member state voted against 7 percent of resolutions. The United States also voted against the most resolutions in 2018 (70 percent) and 2019 (72 percent).

U.S. Isolation: The United States continues to be most diplomatically isolated on Israel-related resolutions in the UN General Assembly. In 2020, the United States voted in isolation against four resolutions¹, which were all development related. The United States voted in near-isolation, with only one other country in opposition, to 16 resolutions: joining Israel on 15 resolutions², and North Korea on A/RES/75/87, “Comprehensive Nuclear-Test-Ban Treaty.”

Contested: Of the 309 draft UNGA resolutions in 2020, 100 draft resolutions (32 percent) were contested and required a vote. There were no plenary resolutions that failed to be adopted in 2020, although some failed to be adopted during the committee stage. The number of roll-call votes in UN resolutions is higher than in most other international fora, where resolutions are traditionally adopted by

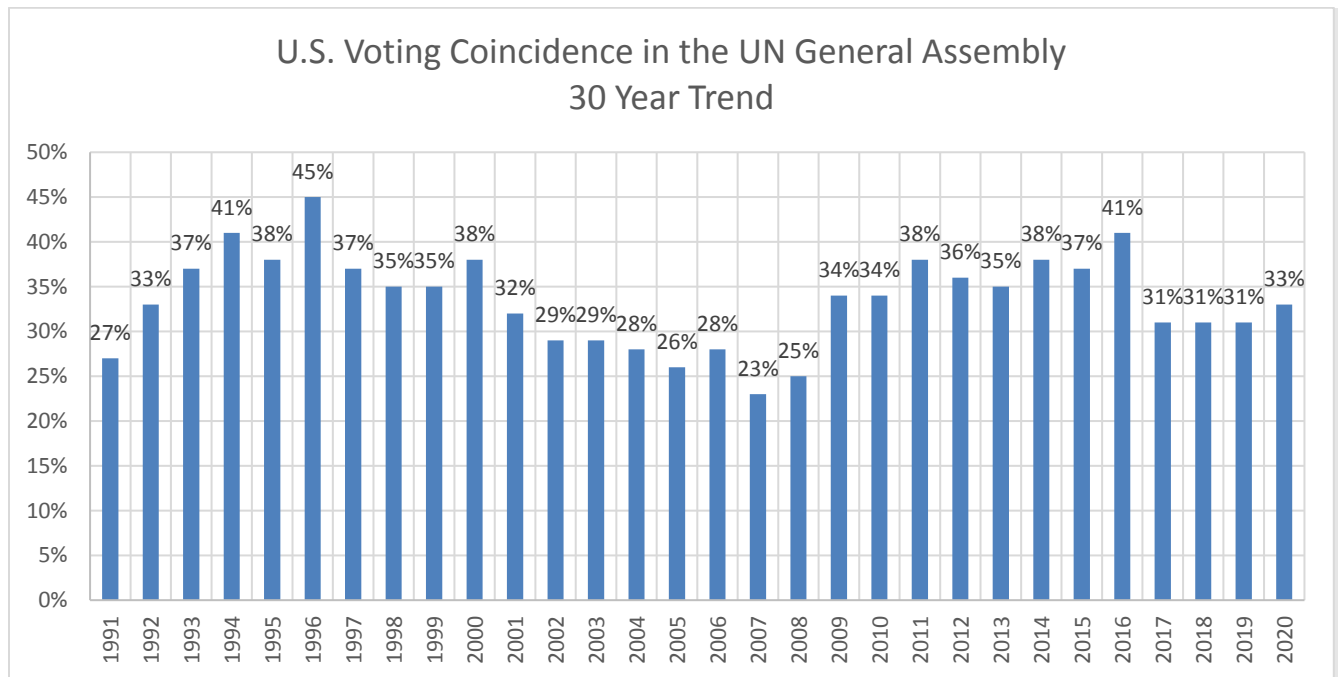

¹ U.S. isolated votes: A/RES/75/204, A/RES/75/213, A/RES/75/130, and A/RES/75/64.

² U.S. votes joined only by Israel on: A/RES/74/306, A/RES/75/254A, 75/254B, 75/254C, 254A-C, 75/203, 75/222, 75/151, 75/179, 75/202, 75/104, 75/93, 75/33, 75/35, 75/69.

consensus. In 2020, the percentage of adoption by vote was slightly higher, compared to 29 percent in the UN General Assembly during 2019.

Absences and Abstentions: The average absentee rate for all member states was eight percent (eight out of 100 contested votes) of votes in 2020, the same as in 2019. The country with the most absences was Somalia, which missed 98 out of 100 votes. Seventy-four member states, including the United States, were present for all 100 votes. In 2020, 10 percent of all recorded votes by all member states in the General Assembly were abstentions. The United States abstained on 10 percent of resolutions (10 votes). While overall absentee rates were comparable with previous years, some countries were absent at a higher rate, in some cases missing all of the Israel-related or important votes, or both. In these instances, it was not possible to calculate voting coincidence with these members, and the charts indicate these instances with “N/A.”

Annual Trends: For historical comparison, the table below shows the global average for all the 192 countries’ UNGA voting coincidence with the United States during the last 30 years:

10-year Average - 35%;

20-year Average - 32%

30-year Average - 33%

I. B — SUMMARY: UN SECURITY COUNCIL

COVID-19 Impacts: In response to the COVID-19 pandemic, Security Council members agreed to convene via video teleconferences (VTC) beginning in March 2020. VTCs began in closed format (for members only) until mid-April, when the Council introduced open format VTCs as well. Between March and July, the UNSC convened only via VTC, resuming some in-person meetings in the larger ECOSOC chamber on July 14. After that, the Council met in both formats (in-person or VTC) until the end of the year. For work that required a formal vote, before in-person meetings resumed, the Security Council introduced a system of “mail-in” voting, by which members provided a written ballot to the Secretariat. Following a second COVID-19 spike in late summer, the Security Council convened more frequently via VTC. While there was a slight decline in resolutions voted on, the decreased activity was due to the nature of the issues at play, rather than from the effects of COVID-19.

In 2020, in addition to the five permanent members – China, France, the Russian Federation, the United Kingdom, and the United States – the UN Security Council (UNSC) was composed of the following non-permanent rotating members: Belgium, the Dominican Republic, Estonia, Germany, Indonesia, Niger, South Africa, Saint Vincent and the Grenadines, Tunisia, and Vietnam. During 2020, the Security Council held 81 public and private meetings and 269 VTCs, adopted 57 resolutions, and issued 13 presidential statements. Of the 269 VTCs, members held 143 open videoconferences and 126 closed videoconferences, including eight with troop- and police-contributing countries. The Security Council considered 43 agenda items and dispatched one new mission to the field, the UN Integrated Transition Mission in Sudan (UNITAMS).

In addition to regular meetings, the Security Council held 46 consultations and 126 closed videoconferences, eight of which were held with troop- and police-contributing countries (TCCs/PCCs) and one held as a briefing by the President of the International Court of Justice. The top three topics discussed during these consultations were: Syria (22 times), Working methods (19), and Yemen (16). Israel-related consultations were held 12 times. The following table summarizes the activity of the Security Council in recent years.

UNSC Activities – 2020 Summary

Year	Meetings Held	Resolutions Adopted	Presidential Statements	Agenda Items Considered	Dispatched Missions to Field
2020	350*	57	13	43	1**
2019	258	52	15	49	5
2018	288	54	21	48	3
2017	296	61	27	52	3
2016	256	77	19	49	5

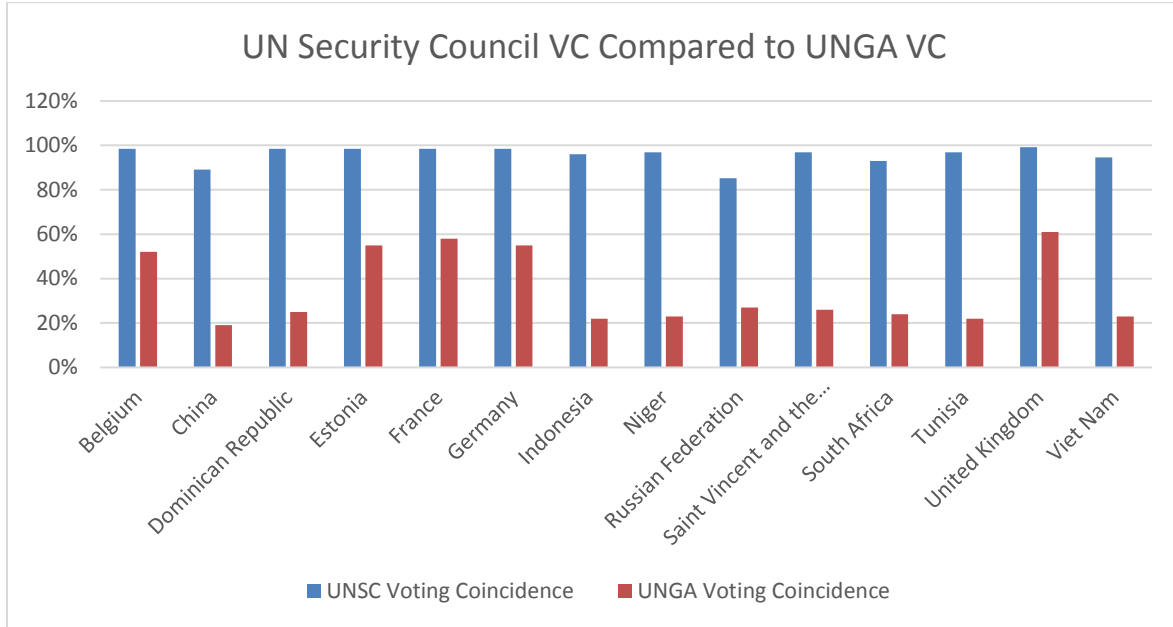

* With COVID-19 restrictions, most 2020 UNSC meetings were conducted via video teleconference.

** With COVID-19 restrictions, the Security Council created only one new mandate for UNITAMS.

VOTING COINCIDENCE

There were 64 votes in the UNSC during 2020, with 44 unanimous votes adopting resolutions and 20 votes being contested, having abstentions, or voted down/vetoed. The Security Council adopted a total of 57 resolutions, and with seven resolutions failing adoption. Of the 64 votes, the United States voted in favor of 59, abstained on two, and voted “no” on three. Only one U.S. no vote was a veto, because at least eight other members also voted no or abstained on the failed resolutions.

The graph below compares the 2020 UNSC members’ voting coincidence on the 64 UNSC votes and the 100 UNGA votes. Overall voting coincidence in the UNSC is significantly and consistently higher than in the UNGA, due to the risk of a P5 veto, which requires thoroughly negotiated compromise language in draft resolutions before they are adopted. This level of compromise is not required in the UNGA due to the one-country one-vote system and lack of a veto, allowing non-binding UNGA resolutions to be adopted with a simple majority (97 of 193) of members. For example, the UNGA could still adopt a resolution if only the 108 countries in the Africa and Asia-Pacific regional groups voted in favor of the resolution.

I. C — FORMAT AND METHODOLOGY

The format and presentation of this report are consistent with provisions in Public Law 101-246, and the methodology employed is the same as that used in the previous years' reports. The methodology ensures that abstentions are reflected. The methodology also emphasizes the votes taken on final resolutions over those taken on preliminary texts and is intended to capture more accurately the voting conduct of UN member states. The tables in this report reflect country "voting coincidence" with the United States based on all recorded final plenary votes in either the UN General Assembly or Security Council. This computation excludes resolutions approved by consensus (without a vote), procedural motions, preliminary votes, or votes on which either the United States or the country with which it is being compared did not cast a vote (absentee). To provide additional context, the report also includes an additional percentage on voting coincidence for all resolutions adopted by the General Assembly, whether by vote or by consensus, to indicate the range of issues on which more or less common agreement exists. This figure is denoted in the column charts under the heading "All Resolutions."

The **methodology** for calculating the "voting coincidence" compares how the United States and the listed country voted. Votes are placed into one of four categories: same; opposite; partial; and absent.

- “**Same**” is the total number of times the United States and the listed country voted together, with each vote counting as one (1) point.
- “**Opposite**” is the total number of times the United States and the listed country voted counter to each other; each vote counts as zero (0) points.
- “**Partial**” is the number of times the United States and the listed country were partially aligned (one country, but not both, abstained on a resolution), each vote is a half point (0.5).
- “**Absent**” is the number of times the listed country did not vote.

Voting Coincidence with the United States is calculated by adding the points, and the total is divided by the total number of votes excluding absences. For resolutions adopted by acclaim, the vote of every country is assigned “same” and calculated accordingly.

Final plenary votes are decisions on full resolutions, and in this report correspond to the resolutions adopted “with a vote.” Preliminary votes are decisions on an operative or preambular paragraph of a resolution. Resolutions can sometimes feature as many as a dozen paragraph votes. Such votes are taken in advance of the final plenary action, and in previous versions of this report, these preliminary votes were combined with final plenary votes in calculating voting coincidence. This practice had the effect of distorting the overall voting coincidence. This distortion stemmed from the repetitive nature of preliminary votes, which may or may not correspond with a member state’s ultimate position on the final plenary vote and inadvertently multiply the relative significance of these resolutions on the voting coincidence metric by the number of paragraph votes. The voting coincidence methodology on contested resolutions in this report only measures a country’s final position on a resolution against the final position of the United States. The General Assembly used silence procedure voting between March and August (described above), and resumed roll-call voting in time for UNGA 75. There were 100 roll-call votes both in 2019 and 2020.

Abstentions (“abstain” votes) are included in coincidence metrics for a more comprehensive review and to better measure the shifting support of countries. Solitary abstentions are provided in a new column titled “partial” identifying either the select country or the United States as having abstained on a vote. While reports prior to 2017 ignored abstentions, by counting single abstentions with a half-point provides more nuance to the voting coincidence metric. Convincing a country to shift its vote from opposite the U.S. position can take significant effort or involve significant political cost if the country is breaking the consensus position in a regional group or ideological voting bloc. Convincing a country to

abstain can be an incremental step toward an eventual reversal or, depending on the overall votes, a successful or useful outcome in itself. These partial successes, which break precedent and can pave the way for further shifts in the future, should not be ignored.

Absences are excluded from voting coincidence calculations since the reasons for a country's absence can vary from political (purposely not attending) to situational (unable to attend). Absentee counts are provided in the "absent" column and should be taken into consideration along with the voting coincidence rate to better understand a country's behavior. In 2020, a few countries were absent for all of the Israel-related or "important" votes, or both, and thus voting coincidence could not be calculated for these countries, since there were no votes to compare.

Consensus resolutions have been excluded (since 1984) from the main voting coincidence metrics, except for the general voting metric noted above. Resolutions adopted by recorded vote address issues of contention more explicitly and are more revealing about whether countries support U.S. positions or oppose them, which is why they were the original focus of the 1984 report. Because the UNGA adopts between 70 and 80 percent of its resolutions by acclaim, however, excluding assessment of consensus resolutions oversimplifies the measure of opposition to U.S. positions, and understates areas of general agreement. Thus, this report follows the existing methodology of previous reports, but now also includes an additional general figure for overall coincidence as well (see charts pages 68-77.) In 2020, consensus became even more important during the COVID-19 lockdown between March and August. Within this period, there was no roll-call voting, only the silence procedure voting as described above. A few countries elected not to submit their annual resolutions to this voting procedure, although the total decline in resolutions considered was only 25 fewer than in 2019 (244 consensus resolutions in 2019 vice 209 consensus resolutions in 2020).

Important issues are defined in the U.S. Department of State's annual U.S. Congressional Report on "Voting Practices in the United Nations" and by Public Law 101-246 which calls for, with respect to plenary votes for the UN General Assembly, a listing of "votes on issues which directly affected important United States interests and on which the United States lobbied extensively." An essential basis for identifying "important" issues is their consistency with the State Department's Strategic Goals.

Israel-related issues are identified by any resolution specifically mentioning the state or territory of Israel. The titles and context of these resolutions usually

remain the same in the annual scapegoating with an annual average of 16-20 one-sided resolutions against Israel (compared to an average of about a dozen country-specific resolutions on the rest of the world combined).

I. D — COUNTRY NAMES

This report uses official United Nations membership country names since this report is based on United Nations data and requires ability to cross reference this report with official voting records from the United Nations. Due to page formatting limits, some tables may use short form or officially assigned International Organization for Standardization (ISO) 3166-1 alpha-3 codes. The use of any country's name in this report does not represent official recognition by the United States or indicate any shift in U.S. policy. For historical research of UN voting practices, country name changes in the United Nations are listed below:

- **The former Yugoslav Republic of Macedonia** changed its official name to **Republic of North Macedonia** (MKD), short form North Macedonia, effective 14 February 2019.
- **Kingdom of Swaziland** (former short form: Swaziland) changed its country name to **Kingdom of eSwatini** (SWZ), short form eSwatini, effective 19 April 2018.
- The **Czech Republic** informed the UN that the short form name to be used for the country is **Czechia** (CZE) on 17 May 2016.
- The Republic of **Cape Verde** changed its official name to The Republic of **Cabo Verde** (CPV) on 24 October 2013.
- **East Timor** changed its official name to **Timor-Leste** (TLS) in 2002.
- **Republic of Zaire** changed its official name to **Democratic Republic of the Congo** (COD) on 17 May 1997.
- **Czech Republic** divided into **Slovakia** and **Czech Republic** (CZE) in 1993.
- **Kampuchea** changed to **Cambodia** (KHM) in 1991.

- **Southwest Africa** changed to **Namibia** (NAM) in 1990.
- **Burma** changed to **Myanmar** (MMR) in 1989. (*The name change is not recognized by the United States*)
- **Ivory Coast** declared in 1986 that **Côte d'Ivoire** (CIV) would be its formal name.
- **Upper Volta** changed to **Burkina Faso** (BFA) in 1984.

II — SECURITY COUNCIL

In 2020, the Security Council considered 64 resolutions, adopting 57 and failing to adopt seven draft resolutions. Of the 64 votes, the United States voted in favor of 59, abstained on two, and voted “no” on three (one of which was a veto). Russia and China vetoed two of the failed resolutions. France and the United Kingdom did not exercise their veto. The table below lists the resolutions of the UN Security Council and voting outcomes.

SIGNIFICANT EVENTS

- In 2020, due to COVID-19 restrictions and following the Secretary-General’s decision to restrict in-person activity in the UN, the Security Council did not convene in person between March 12 and July 14, holding VTCs instead. Despite this, Security Council still considered 64 resolutions and multiple other UNSC products.
- In January, in recognition of the 75th anniversary of the United Nations, the Security Council issued a presidential statement ([S/PRST/2020/1](#)) reaffirming its commitment to the Charter of the United Nations.
- On February 28, the Security Council adopted resolution 2511, which established an exemption procedure for activity necessary to facilitate the work of United Nations and other humanitarian organizations in Yemen. Prior to UNSCR 2511, there was no exemption mechanism for the regime's targeted arms embargo, and the exemptions to the asset freeze were insufficient to

facilitate programmatic activity. This development allows humanitarian activity to continue consistent with the applicable UNSC sanctions.

- On March 30, the Security Council adopted resolution 2518, emphasizing the importance of peacekeeping as one of the most effective tools available to the UN, reaffirming the importance of political solutions, and enhancing the safety and security of United Nations peacekeepers.
- On June 3, the Security Council unanimously adopted resolution 2524, which created the UN Integrated Transition Assistance Mission in Sudan (UNITAMS), a special political mission focused on supporting the Sudan's civilian-led transitional government, strengthening democratic processes, reinforcing Sudanese efforts to build peace, and coordinating international support for Sudan. The resolution, co-penned by the UK and Germany, addressed two important UNSC priorities: (1) providing international expertise for the transitional government at a particularly sensitive time in Sudan and (2) helped define the drawdown plan for the UN-AU Hybrid Peacekeeping Operation in Darfur (UNAMID) after a decade in operation.
- On July 1, the Security Council unanimously adopted UNSCR 2532, which extended support for the Secretary-General's call for a global ceasefire and humanitarian pause as part of the global effort to fight the impacts of the COVID-19 pandemic. The resolution, drafted by France and Tunisia, included a carveout on the ceasefire for legitimate counterterrorism operations. The resolution did not, however, include important language emphasizing the importance of transparency and information sharing, which was blocked by China. This resolution was the first product the Security Council issued on the COVID-19 pandemic and was deliberated for almost four months.
- On July 11, the Security Council adopted resolution 2533 on the Syria cross-border humanitarian mechanism. With its adoption, essential food, shelter, and medicine, including supplies to prevent the spread of COVID-19, continues to flow to Syrians in need in the northwest; however, the loss of the Bab al-Salaam crossing from Turkey to Syria has caused gaps in humanitarian assistance, resulting in further suffering for the Syrian people. Adoption of the resolution, a U.S. priority, was controversial as Russia and China vetoed two separate draft resolutions and in parallel tabled several unsuccessful amendments to previous drafts before the Security Council adopted it.

- On August 28, the Security Council adopted resolution 2538 and a Presidential Statement (PRST), the first presidential text concerning women in peacekeeping since 2018. The text memorialized the 25th anniversary of the Beijing Declaration and Platform for Action, and urged members to commit to implementing the Women, Peace and Security agenda.
- On September 15, resolution 2542 renewed the mandate of the UN Support Mission in Libya (UNSMIL) for an additional year. The updated mandate created a UN Special Envoy for Libya responsible for political mediation with Libyan and international actors in order to bring an end to the conflict, as well as an UNSMIL Coordinator, who is under the authority of the UN Special Envoy and will oversee the day-to-day operations and management of UNSMIL. The creation of the UN Special Envoy was a policy priority for the United States.
- On December 22, the Security Council unanimously adopted resolution 2559, ending the mandate for the UN African Union Hybrid Mission in Darfur (UNAMID) on December 31, 2020. The closure of the mission was the culmination of sustained developments in the peace process, and progress made by the transitional Government of Sudan to address the conflict in Darfur. As of January 1, 2021, UNAMID's troops and police personnel transitioned to providing security for Mission drawdown activities, personnel, and assets, with a six-month period to conduct a phased drawdown. As UNAMID ceases all mandated activities, the government has asserted it will assume its primary role in addressing these activities.

* A P5 “no” vote counts as a veto **only** if there are at least 9 “yes” votes in support of the resolution. If eight other members vote “no” or “abstain,” the P5 “no” vote counts only as a “no” and not as a veto.

III — GENERAL ASSEMBLY: ALL ACTIONS

Public Law 101-246 calls for a listing of all UN General Assembly (UNGA) votes. For 2020, 100 draft resolutions are included in this section; there were no draft resolutions that failed adoption. Of the 100 draft resolutions requiring a vote, the United States voted in favor of 21, opposed 69, abstained on ten, and did not miss any votes. The following resolutions are identified by a resolution number, short title, how the United States voted, and final vote tally.

IV — GENERAL ASSEMBLY: IMPORTANT ACTIONS

Public Law 101-246 calls for a listing of important UN General Assembly (UNGA) votes, defined as “votes on issues which directly affected important United States interests and on which the United States lobbied extensively.” An important basis for identifying issues is their consistency with the State Department’s Strategic Goals. For 2020, 36 resolutions were identified for inclusion in this section; five were adopted without a vote because the United States was able to achieve consensus language through lobbying and engagement, or the resolutions were repeat resolutions from previous years that contained no new or contentious language. The General Assembly adopted the remaining 31 with a vote. Of these 31 important resolutions, the United States voted in favor of 14, opposed 16, abstained on one, and missed no votes. The following resolutions are identified by a short title, resolution number, vote tally (Yes-No-Abstain or “without a vote”), and how the United States voted. Below is a summary analysis of the important elements of the identified resolutions, grouped by general category.

COVID- 19: The United States identified multiple COVID-19 related resolutions as important, including resolutions that: called for international cooperation to ensure access to medical equipment/material and vaccines (A/RES/74/274); called to address challenges faced by seafarers (A/RES/75/17); and called for a comprehensive and coordinated response to the pandemic (A/RES/74/306). The United States successfully blocked problematic language in the seafarer resolution and references to the Maritime Labor Convention, thus enabling our co-sponsorship.

HUMAN RIGHTS: Important human rights resolutions included those that addressed the human rights situations in Myanmar (A/RES/75/238), Iran (A/RES/75/191), Crimea and Ukraine (A/RES/75/192), and Syria (A/RES/75/193). The Syria resolution also established a new interactive dialogue on Syria in the UNGA Third Committee in 2021. The United States lobbied extensively to ensure that the texts of these resolutions reflected the dire situation of human rights in these countries, and in the case of Iran and Crimea, co-sponsored the resolutions. Additionally, the United States supported a resolution on education for democracy that sought to combat hate speech and reinforced U.S. commitment to freedom of expression, thought, conscience, and religion (A/RES/75/199). Due to U.S. lobbying, all 27 EU countries co-sponsored this resolution. The United States also supported a resolution on the promotion of interreligious and intercultural

dialogue, understanding and cooperation for peace (A/RES/75/26), both high priority issues for the United States.

DEVELOPMENT: The United States also engaged heavily on resolutions that included oceans and the law of the sea (A/RES/75/239), international trade and development (A/RES/75/203); international financial systems and development (A/RES/75/204); entrepreneurship for sustainable development (A/RES/75/211); eradicating rural poverty under the 2030 Agenda for Sustainable Development (A/RES/75/232); and partnership for African development (A/RES/74/301).

BUDGET AND REFORM: Important resolutions under the rubric of budget and reform include a series of resolutions that addressed key UN budget and reform efforts. Under budget appropriations for 2021, the United States secured a \$48 million reduction in the 2021 regular budget, achieved increased oversight on UN construction projects, continued to preserve judicial independence for UN tribunals, supported reform of the UN pension board, and increased transparency of key internal reports (A/RES/75/254A). The United States also staved off a G77 proposal to revamp the sequence for approving program planning documents, which would have disrupted the annual budget reform initiative, ensuring continuity in the budget process until 2022 (A/RES/75/254A-C). The United States and like-minded allies also headed off an attempted expansion of the Advisory Committee on Administrative and Budgetary Questions (ACABQ) via an unprecedented plenary vote instead of in the Fifth Committee (A/RES/74/267). Other key reform related resolutions included U.S. lobbying on the comprehensive review of special political missions (A/RES/75/100), and the quadrennial comprehensive policy review of UN development activities (A/RES/75/233).

ARMS CONTROL AND NUCLEAR: U.S. delegation outreach and positive engagement yielded strong results, including broad support for the U.S. cyber resolution and heavy opposition to Russian efforts on “no first placement” in outer space resolution. U.S. outreach beyond traditional allies paid dividends in voting results. In 2020, important resolutions fell into four categories: conventional arms control, countering malign activities by autocratic state actors, outer space/cyber, and nuclear disarmament/nonproliferation. Important conventional arms control resolutions included A/RES/75/241, A/RES/75/29, A/RES/75/50, A/RES/75/64. Important resolutions on outer space and cyber issues included A/RES/75/31, A/RES/75/32, A/RES/75/36, A/RES/75/37, and A/RES/75/240. Nuclear and nonproliferation resolutions included A/RES/75/33, A/RES/75/40, A/RES/75/68, A/RES/75/71, and A/RES/75/87. In the category of countering malign activities, A/RES/75/55 sought to address the issue of chemical weapons and instill

confidence in the Organization for the Prohibition of Chemical Weapons' (OPCW) mandate, including its investigative work in Syria.

V — GENERAL ASSEMBLY: ISRAEL-RELATED ACTIONS

Public Law 101-246, as amended by Public Law 108-447, calls for a listing of all General Assembly plenary votes cast on resolutions specifically related to Israel. This section includes: 1) a listing of Israel-related votes; and 2) voting coincidence percentages with the United States. The annual resolutions condemning Israel are repetitive, disproportionate, one-sided, and do not acknowledge that all parties to the conflict bear direct responsibility for ending it.

During 2020, the General Assembly considered 16 Israel-related resolutions, and adopted all of them – one by acclaim, “Assistance to the Palestinian People” (A/RES/74/117). The other 15 resolutions were adopted by roll-call vote, with the United States and Israel voting against all of them. Of 193 UN members, 28 voted against any of the 15 anti-Israel resolutions **at least once**, one more than in 2019. Four countries (Austria, Liberia, Slovenia, and Switzerland) joined the list, while three (Kiribati, Romania, and the Solomon Islands) dropped off. In 2020, 15 percent of all roll-call votes were abstentions, compared to 12 percent in 2019; 101 countries abstained on anti-Israel resolutions at least once in 2020, compared to 97 countries in 2019.

V. B — VOTING COINCIDENCE ON ISRAEL-RELATED VOTES

The table that follows summarizes UN member state voting records for the 15 “Israel-related” final plenary votes (minus the one resolution adopted by acclaim) that occurred in the UN General Assembly during 2019. The methodology for obtaining the “voting coincidence” can be found in Section I of this report.

VI — GENERAL ASSEMBLY: REGIONAL GROUPS

Originally, UN member states were unofficially grouped into five geopolitical regional groups. What began as an informal means of sharing the distribution of posts for General Assembly committees has taken on a much more expansive role. Depending on the UN context, regional groups may control elections to UN-related positions based on geographic representation, as well as coordinate substantive policy, and form common fronts for negotiations and voting. The methodology for obtaining the “voting coincidence” can be found in Section I of this report. There were a number of members in 2020 who were absent for ALL of either the Israel-related or “important” votes, or both. As such, it is not possible to calculate voting coincidence when there are no votes to compare. These cells are marked with “N/A.” Absentee rates were higher among multiple countries, so voting coincidence figures should be viewed closely according to absentee rates, which will provide a clearer context for voting coincidence.
