TO THE
AGREEMENT BETWEEN THE DEPARTMENT OF DEFENSE
OF THE UNITED STATES OF AMERICA
AND
THE MINISTRY OF DEFENSE OF THE STATE OF ISRAEL
FOR THE
ARROW SYSTEM IMPROVEMENT PROGRAM (ASIP)**

SECTION 1. PURPOSE

1.1. The purpose of this Annex is to establish the terms and conditions regarding the Upper Tier Project, as a supplement to the terms and conditions of the Arrow System Improvement Program (ASIP) Agreement, to which this Annex is a part.

SECTION 2. OBJECTIVE

2.1. The objectives of this Annex are to conduct Preliminary Design and Risk Mitigation activities for the Upper Tier component to the Israeli Missile Defense Architecture and to conduct a joint Analysis of Alternatives (AoA) that will evaluate possible cost effective upper tier interceptor, sensor, and target alternatives.

SECTION 3. SCOPE OF WORK

3.1. The overall work to be undertaken shall consist of:

3.1.1. Preliminary design and risk reduction activities for the Prototype Arrow 3 interceptor including a System Requirements Review (SRR) and Preliminary and Critical Design Reviews for a Arrow 3 flyout test.

3.1.2. Risk mitigation activities, including the design and preparation of an Arrow 3 airframe, risk mitigation for the Arrow 3 Electro Optical Seeker (EOS); Arrow 3 end game Guidance and Control (G&C) and lethality; and risk mitigation for the Arrow 3 to withstand post nuclear explosion phenomena effects.

3.1.3. An evaluation of:

3.1.3.1. Sensor alternatives with enhanced discrimination capabilities.

3.1.3.2. Target alternatives adequate for Upper Tier intercept flight testing.

3.1.3.3. Ground, flight and interoperability test planning requirements.

3.2. In addition to the Israeli Arrow 3 Upper Tier interceptor proposed as the initial focus for preliminary design and risk mitigation in the Upper Tier Project, the MDA and IMDO shall conduct a joint AoA to explore the feasibility of possible cost effective upper tier interceptor alternatives. The study will include definition of alternative Upper Tier interceptors; cost analysis of development, integration, test, and production; and fielding timelines. The MDA/IMDO AOA Terms of Reference will describe the scope and timeline for the AoA.

3.3. The Major Milestone under this Annex will conclude with the PMs' recommendation to the national Senior Representatives (SRs) as to the optimal upper tier interceptor, sensors, and targets; and whether the conceptual design of these elements, technology maturity, and risk are sufficiently favorable to justify entry into Full-Scale Development.

SECTION 4. MANAGEMENT

4.1. The ASIP Program Managers (PM) will also serve as the Upper Tier Project PMs.

4.2. The PMs shall establish Knowledge Points (KP) to determine progress toward meeting objectives defined in Section 2 (Objectives) of this Annex. The FY08 KP shall be to demonstrate by September 2008, through analysis, the ability of the Arrow 3 conceptual design to meet system requirements derived from the current and developing long-range ballistic missile threat.

4.3. The PMs will prepare jointly within two months after this Annex enters into force:

4.3.1. An ASIP Program Plan update, including a plan of action, milestones, and financial plan for this Annex. The updated ASIP Program Plan shall address cost, schedule, performance metrics, and KPs established in this Annex.

4.3.2. Revisions to the ASIP Security Instruction and Classification Guide, as necessary.

4.4. The Project PMs shall conduct:

4.4.1. In-Progress Reviews every six months in accordance with the ASIP Program Plan, including financial/cost/KP reviews, and technical interchange meetings as needed to support reports required.

4.4.2. Monthly status reviews of cost, schedule and performance metrics to be defined in the program plan and KPs defined in this Annex. These reviews may be conducted electronically.

4.5. Within six months from initiating the Upper Tier Project, the PMs will present to their respective SRs an interim progress report on the Scope of Work described in Section 3 (Scope of Work).

4.6. Within twelve months of Program implementation, the PMs will present to their respective SRs their joint recommendation regarding Full Scale Development of the Upper Tier interceptor.

4.7. All activities of the Parties under this Annex will be carried out in accordance with their national laws and regulations, including their security and export control laws and regulations.

4.8. Report formats will be as mutually agreed by the PMs.

SECTION 5. FINANCIAL PROVISIONS
