Introduction :: Algeria

Background:
After more than a century of rule by France, Algerians fought through much of the 1950s to achieve independence in 1962. Algeria's primary political party, the National Liberation Front (FLN), was established in 1954 as part of the struggle for independence and has largely dominated politics since. The Government of Algeria in 1988 instituted a multi-party system in response to public unrest, but the surprising first round success of the Islamic Salvation Front (FIS) in the December 1991 balloting led the Algerian army to intervene and postpone the second round of elections to prevent what the secular elite feared would be an extremist-led government from assuming power. The army began a crackdown on the FIS that spurred FIS supporters to begin attacking government targets. Fighting escalated into an insurgency, which saw intense violence from 1992-98, resulting in over 100,000 deaths - many attributed to indiscriminate massacres of villagers by extremists. The government gained the upper hand by the late-1990s, and FIS's armed wing, the Islamic Salvation Army, disbanded in January 2000. Abdelaziz BOUTEFLIKA, with the backing of the military, won the presidency in 1999 in an election widely viewed as fraudulent. He was reelected to a second term in 2004 and overwhelmingly won a third term in 2009, after the government amended the constitution in 2008 to remove presidential term limits. Longstanding problems continue to face BOUTEFLIKA, including large-scale unemployment, a shortage of housing, unreliable electrical and water supplies, government inefficiencies and corruption, and the continuing activities of extremist militants. The Salafist Group for Preaching and Combat (GSPC) in 2006 merged with al-Qa'ida to form al-Qa'ida in the Lands of the Islamic Maghreb, which has launched an ongoing series of kidnappings and bombings targeting the Algerian Government and Western interests. The government in 2011 introduced some political reforms in response to the Arab Spring, including lifting the 19-year-old state of emergency restrictions and increasing women's quotas for elected assemblies. Parliamentary elections in May 2012 and municipal and provincial elections in November 2012 saw continued dominance by the FLN, with Islamist opposition parties performing poorly. Political protest activity in the country remained low in 2012, but small, sometimes violent socioeconomic demonstrations by disparate groups continued to be a common occurrence. Parliament in 2013 is expected to revise the constitution.

Economy :: Algeria

Economy - overview:
Algeria's economy remains dominated by the state, a legacy of the country's socialist post-independence development model. In recent years the Algerian Government has halted the privatization of state-owned industries and imposed restrictions on imports and foreign involvement in its economy. Hydrocarbons have long been the backbone of the economy, accounting for roughly 60% of budget revenues, 30% of GDP, and over 95% of export earnings. Algeria has the 10th-largest reserves of natural gas in the world and is the sixth-largest gas exporter. It ranks 16th in oil reserves. Strong revenues from hydrocarbon exports have brought Algeria relative macroeconomic stability, with foreign currency reserves approaching $200 billion and a large budget stabilization fund available for tapping. In addition, Algeria's external debt is extremely low at about 2% of GDP. However, Algeria has struggled to develop non-hydrocarbon industries because of heavy regulation and an emphasis on state-driven growth. The government's efforts have done little to reduce high youth unemployment rates or to address housing shortages. A wave of economic protests in February and March 2011 prompted the Algerian Government to offer more than $23 billion in public grants and retroactive salary and benefit increases, moves which continue to weigh on public finances. Long-term economic challenges include diversifying the economy away from its reliance on hydrocarbon exports, bolstering the private sector, attracting foreign investment, and providing adequate jobs for younger Algerians.

<tr>
<td><strong>general assessment:</strong></td>
<td>privatization of Algeria's telecommunications sector began in 2000; three mobile cellular licenses have been issued and, in 2005, a consortium led by Egypt's Orascom Telecom won a 15-year license to build and operate a fixed-line network in Algeria; the license will allow Orascom to develop high-speed data and other specialized services and contribute to meeting the large unfulfilled demand for basic residential telephony; Internet broadband services began in 2003</td>

<tr>
<td><strong>domestic:</strong></td>
<td>a limited network of fixed lines with a teledensity of less than 10 telephones per 100 persons has been offset by the rapid increase in mobile-cellular subscribership; in 2011, mobile-cellular teledensity was roughly 100 telephones per 100 persons</td>

### Transnational Issues:: Algeria

#### Disputes - international:
- Algeria and many other states reject Moroccan administration of Western Sahara; the Polisario Front, exiled in Algeria, represents the Sahrawi Arab Democratic Republic; Algeria's border with Morocco remains an irritant to bilateral relations, each nation accusing the other of harboring militants and arms smuggling; dormant disputes include Libyan claims of about 32,000 sq km still reflected on its maps of southeastern Algeria and the National Liberation Front's (FLN) assertions of a claim to Chirac Pastures in southeastern Morocco

#### Refugees and internally displaced persons:
- refugees (country of origin): 90,000 (Western Saharan Sahrawi, mostly living in Algerian-sponsored camps in the southwestern Algerian town of Tindouf); 1,500 (Mali) (2013)
- IDPs: undetermined (civil war during 1990s) (2012)

#### Trafficking in persons:
**current situation:** Algeria is a transit and, to a lesser extent, a destination and source country for women, and, to a lesser extent, men subjected to forced labor and sex trafficking; criminal networks, which sometimes extend to sub-Saharan Africa and to Europe, are involved in both human smuggling and trafficking; sub-Saharan adults enter Algeria voluntarily but illegally, often with the aid of smugglers, for onward travel to Europe, but some of the women are forced into prostitution; some Algerian women are also forced into prostitution; some sub-Saharan men, mostly from Mali, are forced into domestic servitude

**tier rating:** Tier 3 - Algeria does not fully comply with the minimum standards for the elimination of trafficking and is not making significant efforts to do so; the government has not held any perpetrators of sex trafficking or forced labor accountable with jail time; some trafficking victims are treated as illegal migrants and are subject to arrest, detention, and deportation because authorities continue to confuse human trafficking and smuggling; the government has not developed or employed systematic procedures for identifying trafficking victims and referring them for protective services; no public awareness campaigns are conducted and no plan of action was developed to complement Algeria's anti-trafficking law (2013)
