Introduction: Lebanon

Background:
Following World War I, France acquired a mandate over the northern portion of the former Ottoman Empire province of Syria. The French demarcated the region of Lebanon in 1920 and granted this area independence in 1943. Since independence the country has been marked by periods of political turmoil interspersed with prosperity built on its position as a regional center for finance and trade. The country's 1975-90 civil war that resulted in an estimated 120,000 fatalities, was followed by years of social and political instability. Sectarianism is a key element of Lebanese political life. Neighboring Syria has long influenced Lebanon's foreign policy and internal policies, and its military occupied Lebanon from 1976 until 2005. The Lebanon-based Hizballah militia and Israel continued attacks and counterattacks against each other after Syria's withdrawal, and fought a brief war in 2006. Lebanon's borders with Syria and Israel remain unresolved.

Economy :: Lebanon

Economy - overview:
Lebanon has a free-market economy and a strong laissez-faire commercial tradition. The government does not restrict foreign investment; however, the investment climate suffers from red tape, corruption, arbitrary licensing decisions, complex customs procedures, high taxes, tariffs, and fees, archaic legislation, and weak intellectual property rights. The Lebanese economy is service-oriented; main growth sectors include banking and tourism. The 1975-90 civil war seriously damaged Lebanon's economic infrastructure, cut national output by half, and derailed Lebanon's position as a Middle Eastern entrepot and banking hub. Following the civil war, Lebanon rebuilt much of its war-torn physical and financial infrastructure by borrowing heavily - mostly from domestic banks - saddling the government with a huge debt burden. Pledges of economic and financial reforms made at separate international donor conferences during the 2000s have mostly gone unfulfilled, including those made during the Paris III Donor Conference in 2007 following the July 2006 war. The collapse of the government in early 2011 over its backing of the Special Tribunal for Lebanon and unrest in neighboring Syria slowed economic growth to the 1-2% range in 2011-12, after four years of 8% average growth. In September 2011 the Cabinet endorsed a bill that would provide $1.2 billion in funding to improve Lebanon"s downtrodden electricity sector, but fiscal limitations will test the government's ability to invest in other areas, such as water.

Transnational Issues :: Lebanon

Disputes - international:
lacking a treaty or other documentation describing the boundary, portions of the Lebanon-Syria boundary are unclear with several sections in dispute; since 2000, Lebanon has claimed Shab'a Farms area in the Israeli-occupied Golan Heights; the roughly 2,000-strong UN Interim Force in Lebanon has been in place since 1978

Refugees and internally displaced persons:
refugees (country of origin): 436,154 (Palestinian refugees (UNRWA)) (2011); 6,516 (Iraq) (2012); 739,823 (Syria) (2013)
IDPs: at least 47,000 (1975-90 civil war, 2007 Lebanese security forces' destruction of Palestinian refugee camp) (2011)

Trafficking in persons:
current situation: Lebanon is a source, transit, and destination country for women and children subjected to forced labor and sex trafficking; Eastern European women and children are transported through Lebanon for sexual exploitation in other Middle Eastern countries; women from Sri Lanka, the Philippines, Ethiopia, Kenya, Bangladesh, Nepal, Madagascar, Congo, Togo, Cameroon, and Nigeria are recruited by agencies to work in domestic service but are often subject to conditions indicative of forced labor, including the withholding of passports, nonpayment of wages, restricted movement, threats, and abuse; Lebanon’s artiste visa program enabling women to work as dancers for three months in the adult entertainment industry sustains a significant sex trade; anecdotal information indicates some Lebanese children are victims of forced labor, such as street begging and commercial sexual exploitation; Syrian refugee women and children in Lebanon...
are at increased risk of sex trafficking

**tier rating:** Tier 2 Watch List - Lebanon does not fully comply with the minimum standards for the elimination of trafficking; however, it is making significant efforts to do so; the government conducts investigations of human trafficking and possibly some prosecutions but for another year did not report convicting any trafficking offenders or officials complicit in human trafficking; the government continues to lack a formal system for identifying victims and does not have a policy to protect victims from being punished for crimes committed as a direct result of being trafficked; NGOs, rather than the government, provide victim assistance and protection (2013)

**Illicit drugs:**
cannabis cultivation dramatically reduced to 2,500 hectares in 2002 despite continued significant cannabis consumption; opium poppy cultivation minimal; small amounts of Latin American cocaine and Southwest Asian heroin transit country on way to European markets and for Middle Eastern consumption; money laundering of drug proceeds fuels concern that extremists are benefiting from drug trafficking
